

THE SEXUAL SUPERNOVA

Are you ready to rocket beyond the stratosphere, into powerful pleasure that eclipses anything you have experienced before? Expand your sexual universe with **Bi STRONIC FUSION**, the groundbreaking new toy that thrusts, pulses, vibrates, flutters, and pretty much gives you everything you have ever wanted.

FEEL THE FUSION

Made in
Germany

GALACTIC STRONIC INNOVATION

- The bestselling **STRONIC** line just got better, with a new design that combines the thrusting and pulsing power that customers love with a strong external vibrator.
- This is the only toy on the market to give the vagina exactly what it needs: pressure and movement internally and vibration externally.

*The perfect combination
One-of-a-kind
Innovation for your orgasm.*

CUSTOMIZE YOUR FUN

FUN

- **Bi STRONIC FUSION** boasts two ways to play: a pulsator in the shaft and a vibrator in the clitoral extension.
- Start by pressing the **FUN** button for half a second. Both the shaft and the motor will switch on.
- Use the button with the larger dot to scroll through the 9 pulsation settings and the button with the smaller dot to explore the 7 vibration settings.
- You can also press down on the button with the larger dot for half a second to turn the shaft off or do the same to the button with the smaller dot to turn off the vibrator. If both are off for 30 seconds (the “standby” setting), the **Bi STRONIC FUSION** will automatically turn off.

*An exciting variety
of thrusting
and vibrating settings
64 possible combinations*

SHAFT

- Shallow grooves run up down the sizeable shaft, stimulating the sensitive vaginal opening as the toy thrusts.
- A slight bulge at the tip makes G-spot or prostate massage a breeze.

Stimulation from every angle

VIBRATOR

- The **Bi STRONIC FUSION**'s extension features the most powerful external motor on the market.
- The extension is also flexible, letting you target the clitoris or press it against the perineum.

*Strong and flexible,
for ultimate versatility*

WINGS

- Thin silicone wings on either side of the extension flutter against the labia when the vibrator is pressed against the clitoris.

It's not just about the clit.

HANDS-FREE FUN

- Once you find your favorite setting and position, the **Bi STRONIC FUSION** can be used hands-free.
- This is a great toy for getting extra stimulation during partner play (while giving oral sex, for instance) or for people with mobility issues that make vibrator and dildo use challenging.

Why not read some erotica or perfect your sexting, since both hands are free?

SAVE YOUR SETTINGS

- Found the ideal combination of pulsation and vibration? To save it, hold down the FUN button for at least 4 seconds, until the buttons blink twice and the control unit vibrates briefly. Next time you turn on your toy, it will start with your favorite settings.

No need to keep clicking – get right down to business!
